

Mandatory Safety Training Requirements

The Department of Chemistry requires all workers (faculty, staff, and student workers), students and visitors to complete all their safety training before commencing work, including the mandatory training, site-specific orientations, and task specific training. The department requires all safety training to be documented and kept by using the Red Chemistry Safety Folders. The supervisor is responsible for maintaining records of all training documents in a single location that is readily available. The Red Chemistry Safety Folders can be picked up from the reception area at the Chemistry Main Office located in CHEM D223.
